FARUK BADSHA

Summary

MERN Stack Developer with a background in Software Quality Assurance (SQA), combining full-stack development skills with a disciplined testing mindset. Recently completed comprehensive MERN stack training and built production-ready projects including a news portal and a full e-commerce platform with admin features. Seeking a junior MERN Stack Developer role where I can contribute with strong attention to detail, problem-solving ability, and a focus on clean, reliable code.

SKILLS

Frontend: HTML5, CSS3, Tailwind CSS, React.js, JavaScript, TypeScript

Backend: Node.js, Express.js, RESTful APIs, JWT Authentication

Database: MongoDB, MongoDB Atlas, SQL, PostgreSQL

Tools: Git, GitHub, Postman, Render, Vercel, Netlify, Cloudinary.

Programming Languages: JavaScript, TypeScript, Java, C

Testing: Unit Testing, Integration Testing, Manual Testing, Automation Testing

Development Environment: VS Code, Cursor AI, GitHub Copilot, Claude AI

Soft Skills: Good communication in English and Bengali, hardworking, good time management, soft skill development

PROJECTS

News Portal - MERN Stack Project

MongoDB, Express, React, Node.js, TypeScript

- Built a **news portal with admin panel** featuring search, comments, and a breaking news banner.
- Developed as a full-stack application with a focus on usability and maintainable structure. [Live Demo](#) | [GitHub](#)

ShopEase - Complete E-Commerce Solution

MongoDB, Express.js, React.js, Node.js, SSL Commerz, Render

- Built separate **User** and **Admin** interfaces for a production-ready e-commerce platform.
- Integrated **SSL Commerz payment gateway** for secure transactions.
- Implemented **real-time order tracking** and **product inventory**

management. [User Site](#) | [Admin Panel](#) | [GitHub](#)

QA Project - Web Automation

- Created automation scripts for **login, registration, product addition, selection, and purchase** workflows.
- Improved testing coverage for e-commerce functionality and supported smoother user interactions.

[GitHub](#)

QA Project - App Automation

Automated application workflows using **TestNG** for efficient test executio

Configured the appropriate **WebDriver** for different scenarios and improved testing efficiency.

- Automated complex workflows to enhance **software quality** and reliability. [GitHub](#)
